# RNBO~ Presets

In the inspector you can choose which objects to include in your presets. By default param objects are included.

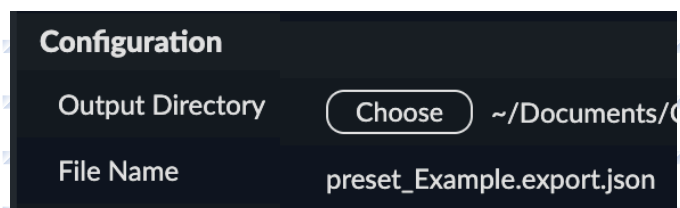

In the parent .maxpat select "Show Snapshots" from the toolbar. You should now see the patcher snapshots. select the rnbo~ object and rnbo~ snapshots will be pulled up

The snapshots you save will be included
in your rnbo~ export as presets

For a web export remember the file name you export to

In app.js make sure that the patchExportURL (line 2) is the correct path and file name

```
1  async function setup() {
2  💡   const patchExportURL = "export/patch.export.json";
3
```

```
1  async function setup() {
2  💡   const patchExportURL = "export/preset_Example.export.json";
3
```
